

Installation guide

Thank you for purchasing from fant_c J

This is the guide you can follow to make your Norton run in a while.

Step 1 Download from Norton official site

Here I offer you guys some most popular version download link from official site (for other version, you can check your local Norton official site):

English

<http://liveupdate.symantec.com/upgrade/NIS10UPEN.exe>

French

<http://liveupdate.symantec.com/upgrade/NIS10UPFR.exe>

Chinese

<http://liveupdate.symantec.com/upgrade/NIS10UPCH.exe>

Suede

<http://liveupdate.symantec.com/upgrade/NIS10UPSW.exe>

Spanish

<http://liveupdate.symantec.com/upgrade/NIS10UPES.exe>

Italian

<http://liveupdate.symantec.com/upgrade/NIS10UPIT.exe>

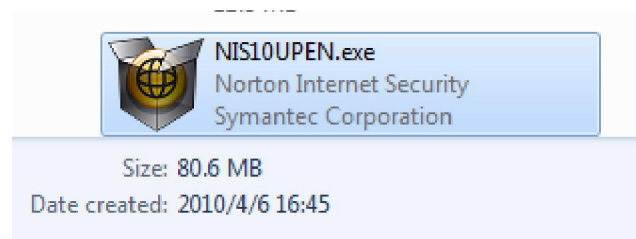

Russian

<http://liveupdate.symantec.com/upgrade/NIS10UPRU.exe>

Slovania

<http://liveupdate.symantec.com/upgrade/NIS10UPSL.exe>

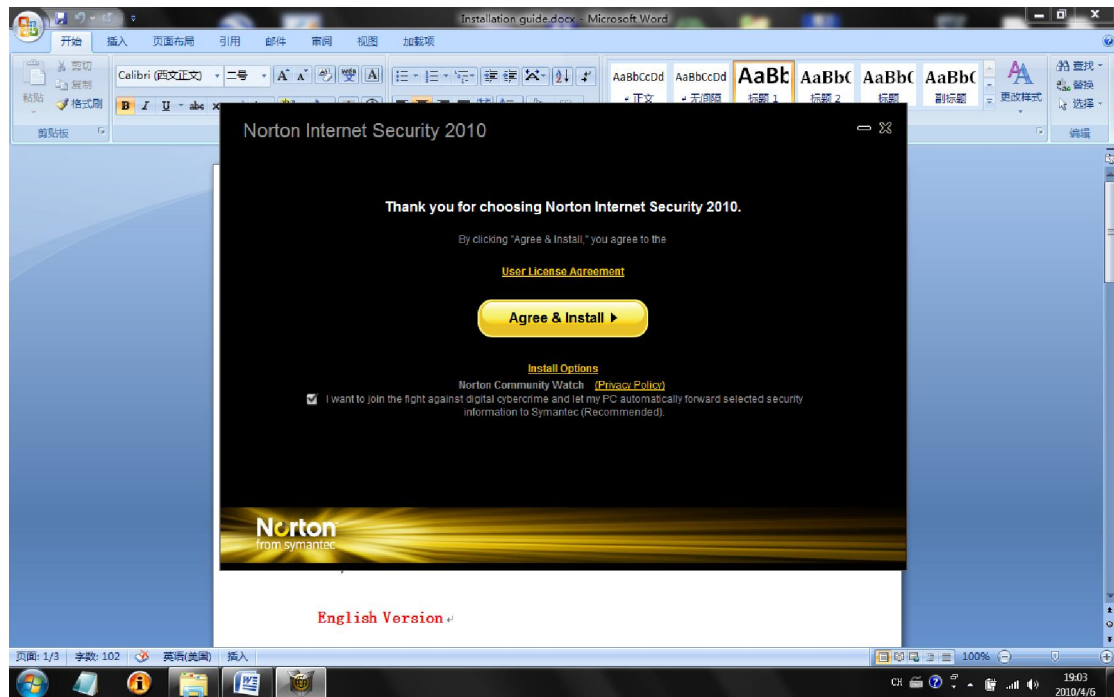

Step 2 Run the Norton application that you have just downloaded

Double click what you have downloaded from the link above

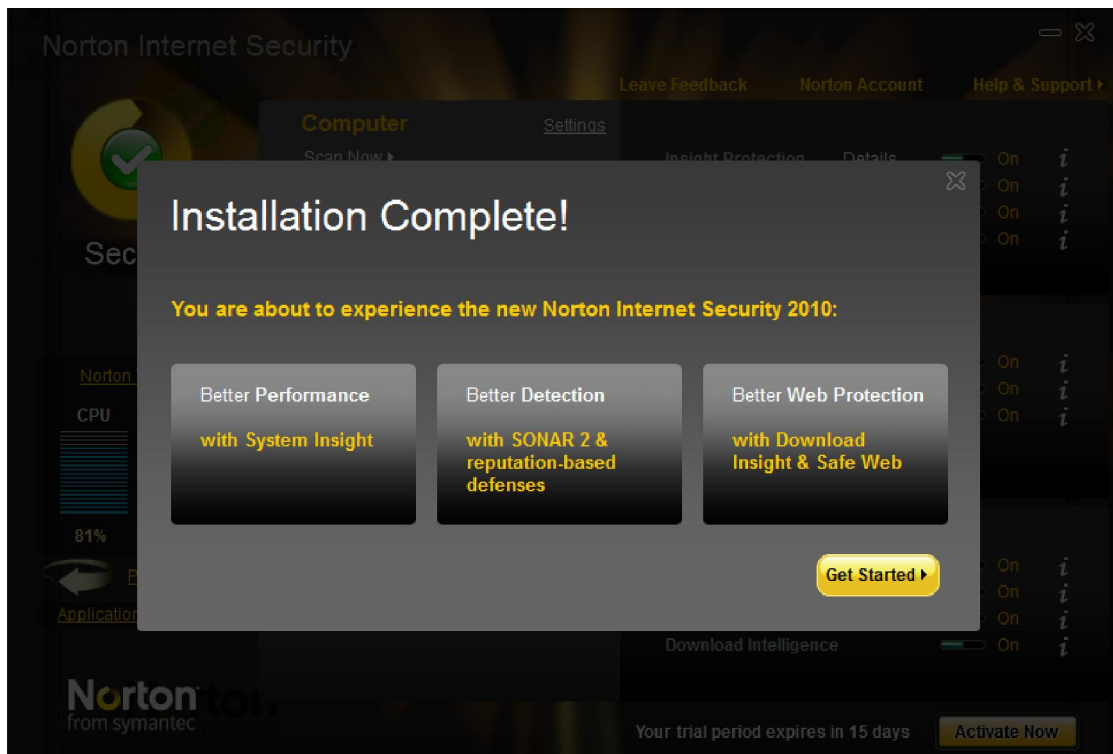

Application will then initializing

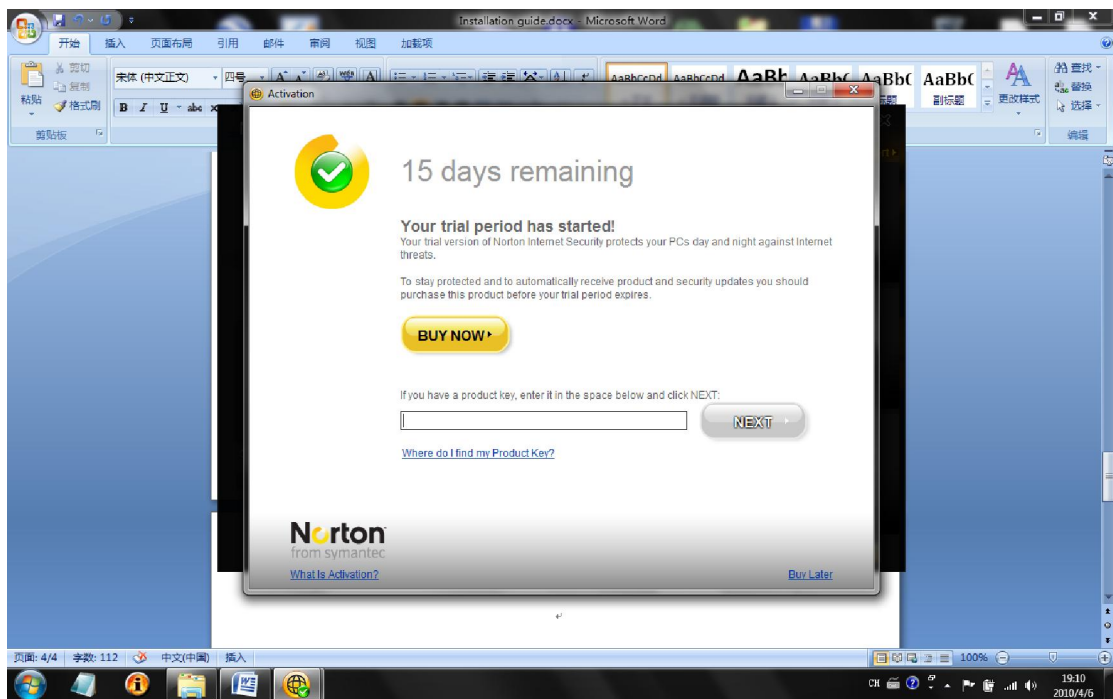

Wait for some time, then click

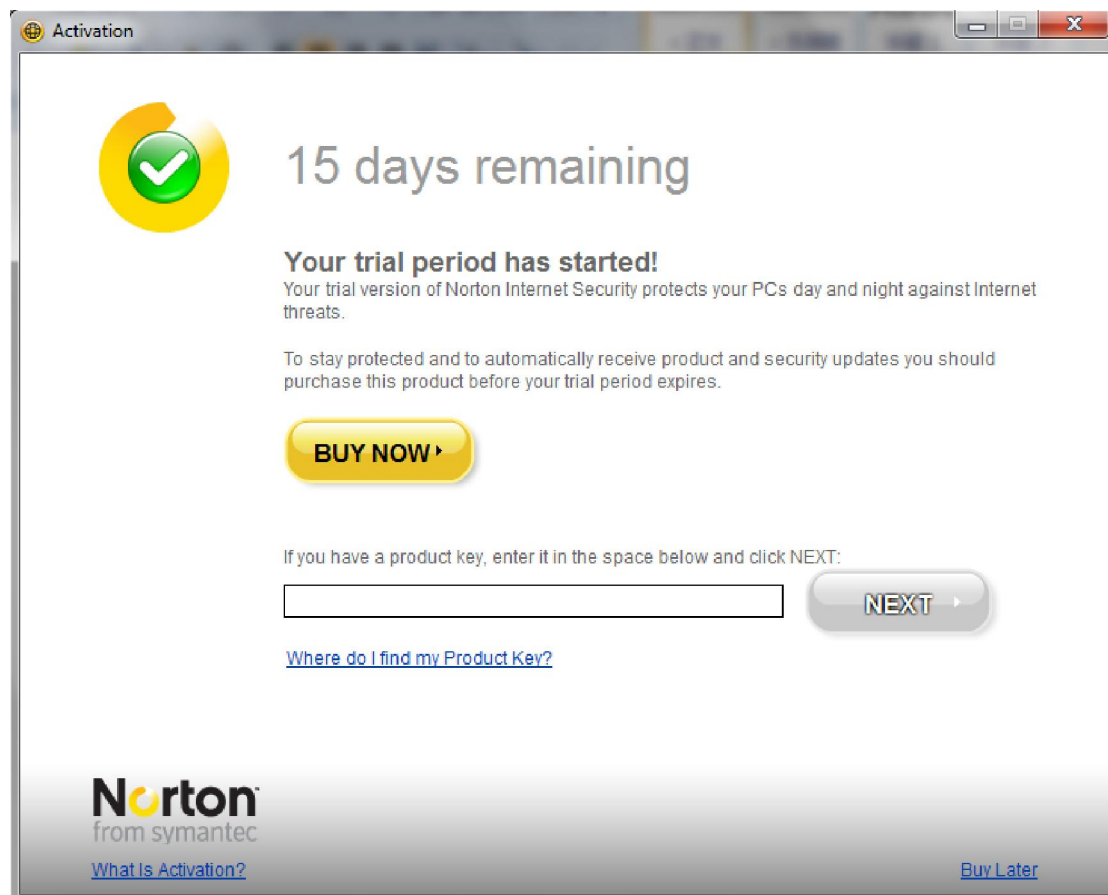

Then the program will be installed automatically

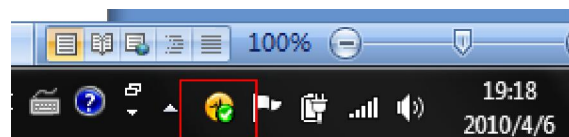

You will see this when install complete, and a popup windows:

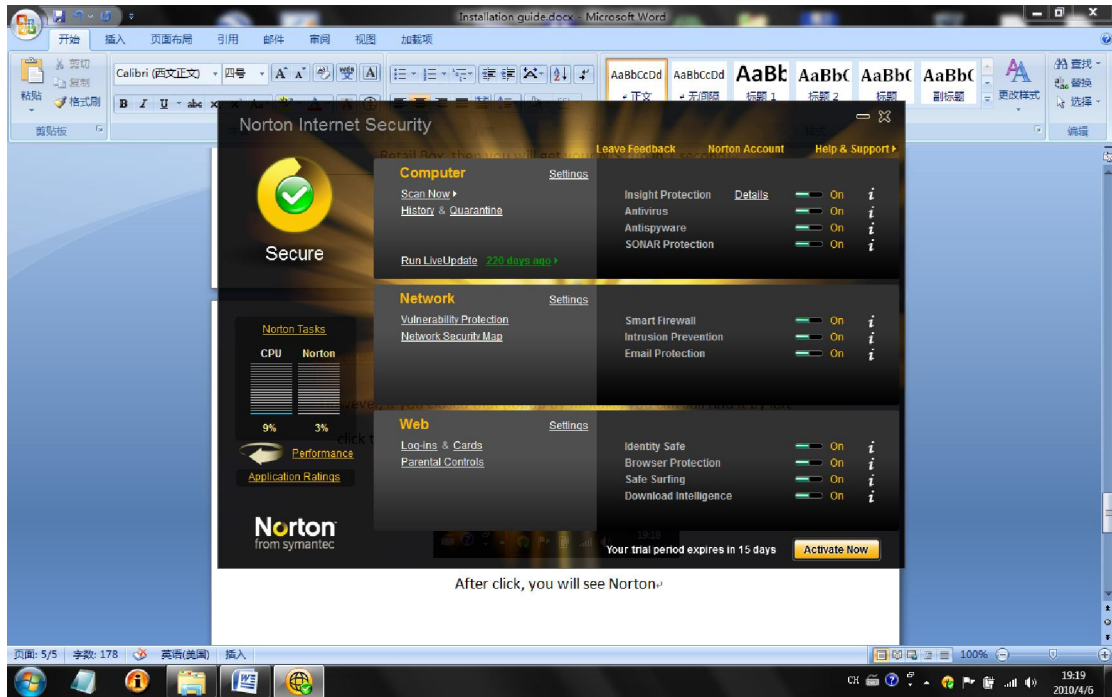

Enter your license in your backup Email, or **on the back of your CD** in the Retail Box, then you will get your NIS run in 1 second!

However, if you closed that popup by mistake, you can still find it by left click the Norton Internet Security 2010 icon at the right side of the bottom of your screenJ

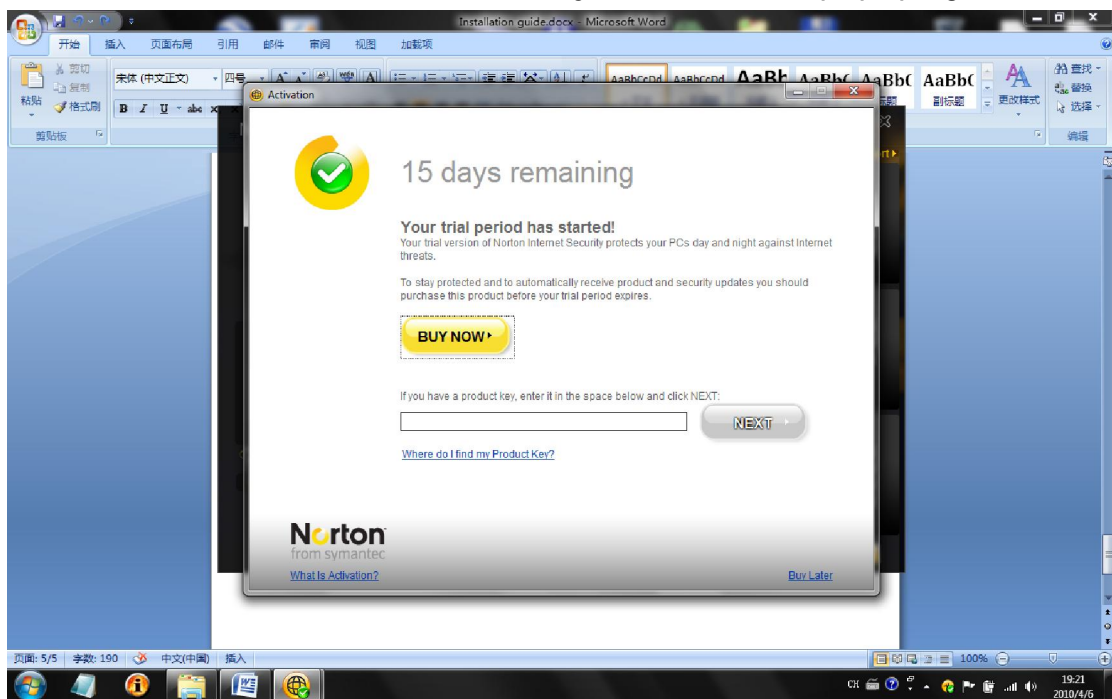

After click, you will see Norton come out

Now click

, then you will see the popup again J

Enter your license J

Now you have already got fully protected by NIS 2010

Have a nice day.
